### DETAILED ACTION

Applicant's arguments filed 12/21/04 have been fully considered and do overcome the 112 rejection, however they are not persuasive to overcome the 103 rejection.

Applicant argues that the *in vitro* teachings of the reference are not sufficient to render obvious the claimed invention but it is unclear how that can be the case when applicant appears to be relying on *in vitro* studies to support their claims. Plus, it should be noted that applicant's claims only require an "enhancement of migration" which is not a strenuous requirement given the teachings of the prior art regarding the effected chemotaxis. A showing to overcome a prima facie case of obviousness must be clear and convincing( *In re Lohr et al.* 137 USPQ 548) as well as commensurate in scope with the claimed subject matter ( *In re Lindner* 173 USPQ 356; *In re Hyson*, 172 USPQ 399 and *In re Boesch et al.*, 205 USPQ 215 (CCPA 1980).

### *Claim Rejections - 35 USC § 103*

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the

time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 10 & 85-105 rejected under 35 U.S.C. 103(a) as being unpatentable over Yamaguchi et al(*J Bone and Mineral Research* Vol 13(10) 1998).

Yamaguchi teaches that CaR agonists stimulate the chemotaxis of cells having the CaR. The reference does not teach administering an agonist to a subject but given the teachings of Yamaguchi, it would have been obvious to administer an agonist to a subject in order to facilitate the migration of any known CaR-having cell with the reasonable expectation that the cells would migrate to the concentration of the agonists just as Yamaguchi showed *in vitro*. It also follows that if agonists will effect migration, then antagonists will as well.

Accordingly, the claimed invention was prima facie obvious to one of ordinary skill in the art at the time the invention was made especially in the absence of evidence to the contrary.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

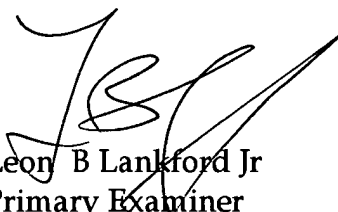

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to

37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
